

# Things to Know About Using CoreLogic Fusion Experience

---

## What is CoreLogic Fusion Experience?

- CoreLogic Fusion Experience is a free application you can download from the iTunes App Store that makes it possible to access the main features of the Fusion MLS system from your iPad.
- CoreLogic Fusion Experience on your iPad looks the same as Fusion on your computer, only smaller.

## Getting Started

1. Before you begin, note that you need an iPad running IOS 5 or later to use Fusion Experience. You can upgrade your iPad to this operating system through iTunes. After you have updated to the latest version, sync your iPad with your computer.
2. Search for and install *CoreLogic Fusion Experience* from the iTunes App Store. It is a free application.
3. Once you have installed the app on your iPad, click the CoreLogic Fusion Experience icon to go to your MLS login screen and start using Fusion.

## Navigation Tips

- The mouse icon at the bottom left corner lets you navigate the system as if you were using a mouse or laptop track pad. Tap this icon to display the on-screen mouse pad, and then move your finger on the pad to control the mouse cursor. To click with the mouse cursor, tap the mouse pad with your finger. To reposition the mouse pad, tap and drag its title bar. Tap the mouse icon again to turn off the mouse pad—you can use the mouse pad and traditional navigation methods interchangeably.
- You can scroll and use drag and drop controls with the mouse pad. To scroll, place the mouse cursor on the scroll bar, and then use two fingers and slowly drag on the mouse pad.
- You cannot use the mouse cursor outside of the framed window. If you open new tabs, you will need to close them by tapping on the X.
- Tap the keyboard icon in the bottom right corner of the screen to display or hide the on-screen keyboard. When entering data, use the Next key to quickly move to the next field.
- If you need to refresh the screen, tap the middle bottom icon at the bottom of the screen and then choose Refresh from the list.
- Note that CoreLogic Fusion Experience may not be compatible with some external keyboards.

## Unavailable Features

Please be aware that certain Fusion features are not yet available via Fusion Experience, including:

- Uploading photos
- The Report Editor
- Printing
- Right-click options
- Importing or exporting data and images

Once App is installed – Open app, click on California - Select San Diego County's Regional MLS

After selecting San Diego, you will go to the Normal MLS Log-In Screen – Use your MLS ID and Password to log in to FUSION. After your initial log in, the application will remember and always open to the Sandicor log-in screen.

***IMPORTANT NOTE: Remember to log out of FUSION when you are done using the App. The Sign Out Link is in the top Right Corner***
